

Work Smarter, Not Harder

by Artem

How I used to do things

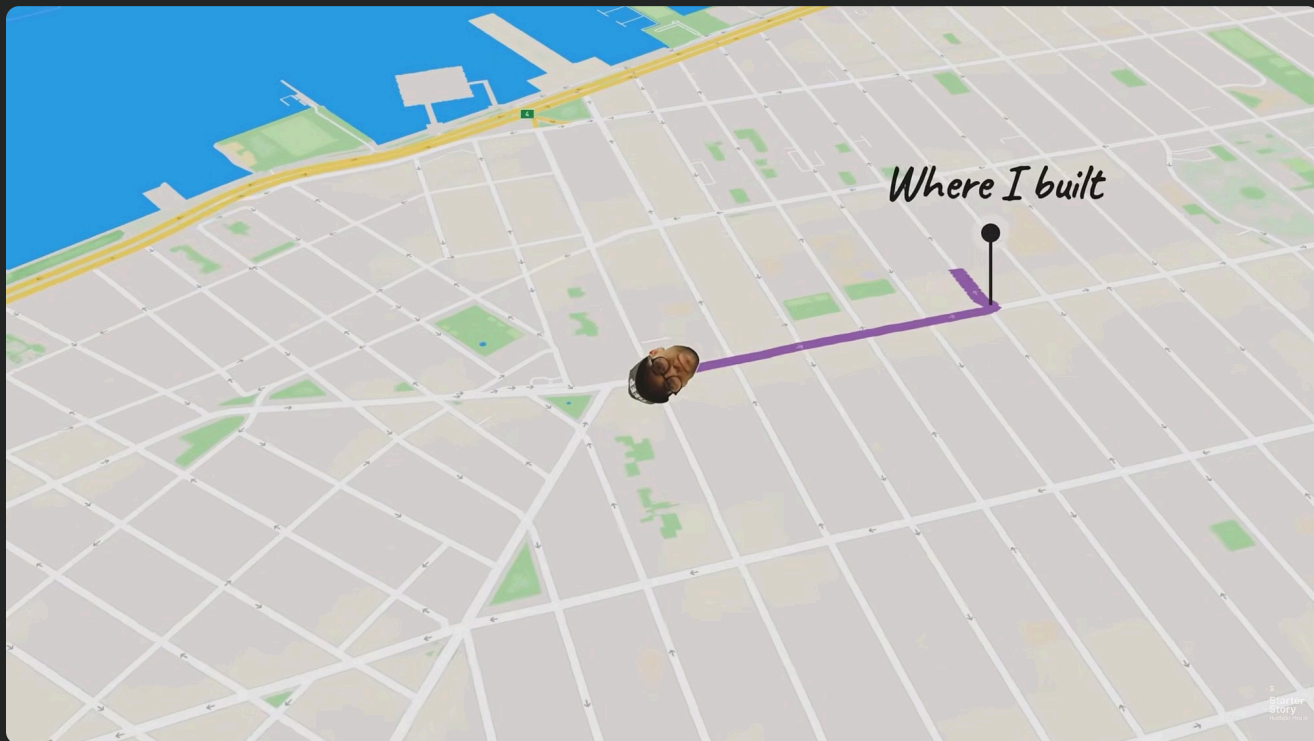

- December 2023
- A similar video to the one I just finished
- I didn't edit the whole video, just this animation
- Went on Freepik
- Found an Illustrator file of NYC
- Animated Manually

A whole day for a 10-15-sec animation

Watch

What I did now

- 2 hours total on 30-60 seconds of this animation
- Lowkey looks better
- I actually had way more control and was able to think the story through better

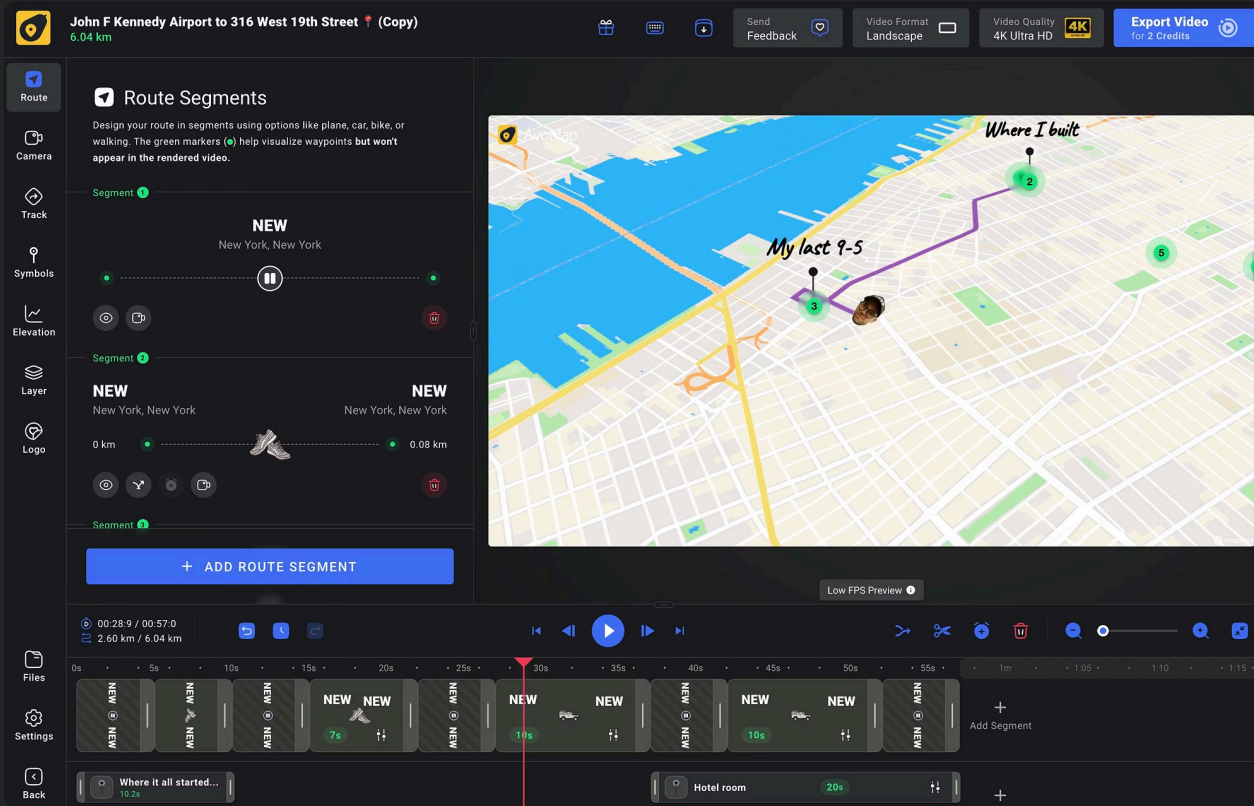

[Click here](#)

#1: Perplexity for problem-solving

✓ Prompt properly:

Hey, so I somehow need to create a simple animation of a map that's going to look like Google Maps, and I need it to be specifically animated so that the dot is going to be moving across a path on Google Maps. What's the most efficient way for me to do this? What's like a website or something like that that can help me do this?

#2: Simplify, simplify, simplify

- In my case, it was using a simple web app
- Can be using Descript for simple cutting

⚠ Stop thinking more complicated software = better result

#2: Simplify, simplify, simplify

- ✔ Stop creating vizualizations from scratch for everything. Instead, screenshot/record.

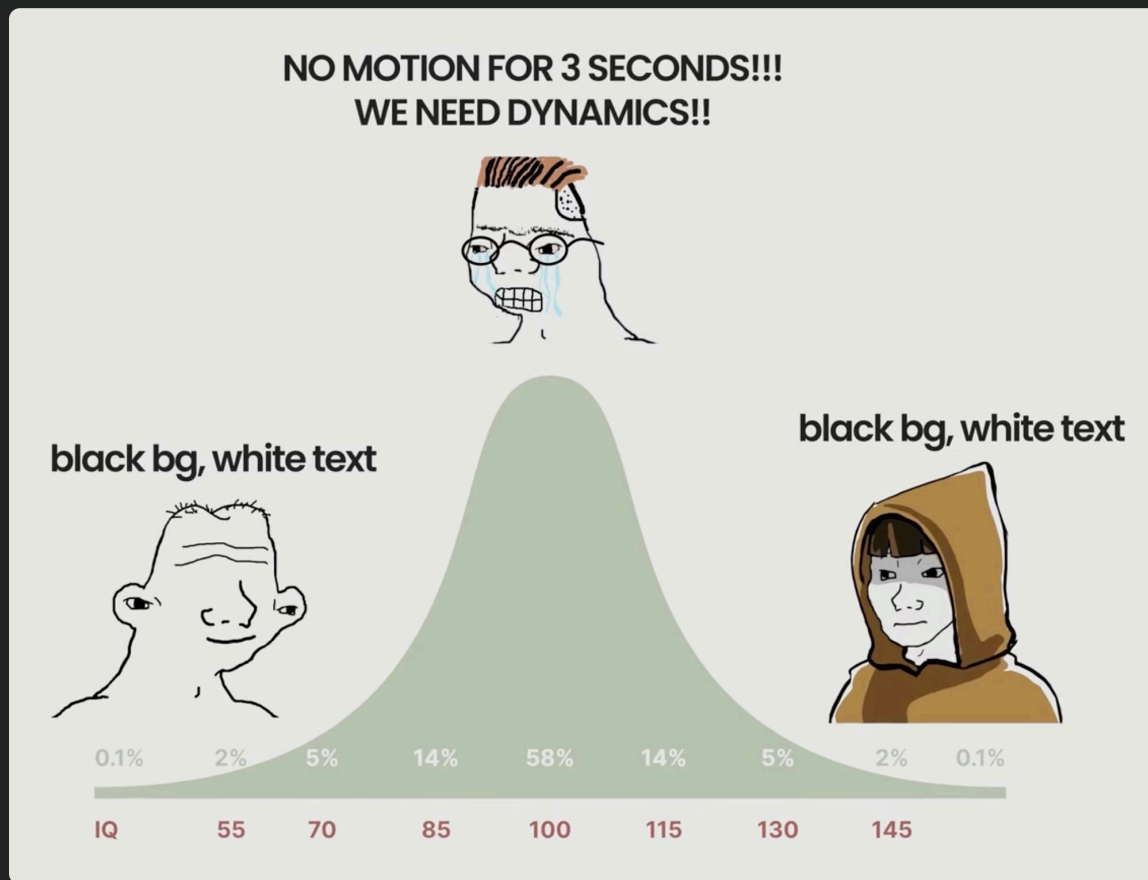

Abody screenshotted this gallery of videos from a website

#2: Simplify, simplify, simplify

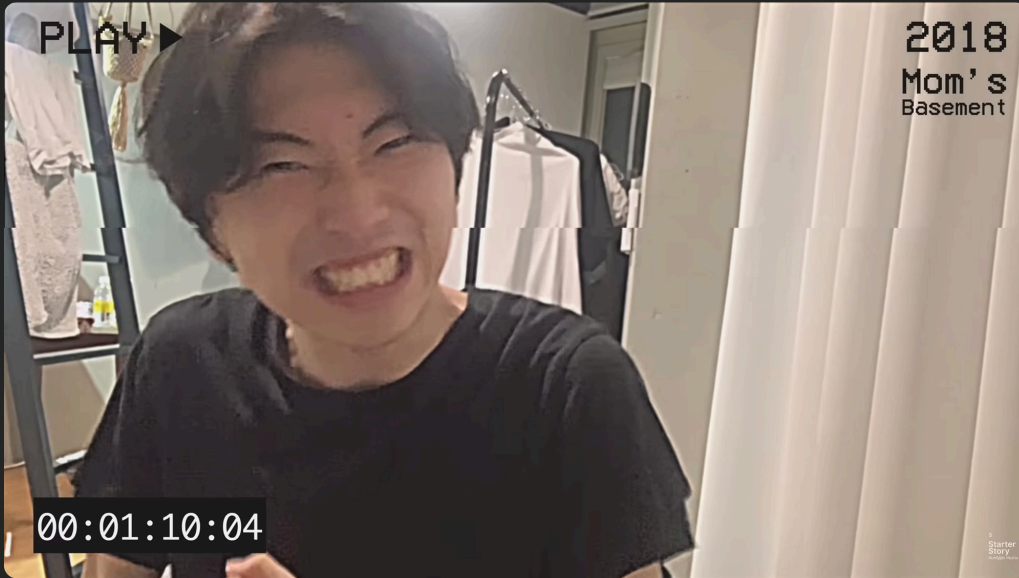

Tiago created this whole cork board, but realistically needed only two elements.

To learn to simplify, you need to go through the middle:

#3: Templates/MOGRTs

Made from scratch

Template from Envato

This all comes from the perfectionism and thinking harder to create = better result

#3: Templates/MOGRTs

On Envato, they have Pr and Ae version for every template:

100 Frame By Frame Animated Arrows
by MotionPub

Frame By Frame Hand Drawn Arrows
by MotionPub

I used to ALWAYS download the Ae version thinking harder to create = better result

#4: Find music all at once

Here's a workflow I want you guys to try out:

1. Do the VO/rough cut
2. Get familiar with what the video is about
3. Understand which main emotion the video is trying to convey
4. Go on Epidemic, set two filters max, and just download a bunch of songs all at once:

www.epidemicsound.com

Sentimental Music | Royalty Free Download | Epidemic Sound

Listen, explore and use royalty-free Sentimental music with an Epidemic Sound subscription. [Listen and sign up here](#)

Since I needed more than 6 songs, I just used the Similar Tracks feature later.

#4: Find music all at once

Pros of this approach:

- You don't hyperfixate on one phrase that sounds sad to you, and so you try to find a sad song for the whole Story Block
- Instead, you focus on the big picture of the video. Exactly what matters to the viewer

#5: Stop being ADHD

New rule I want you to experiment with for graphics:

✓ NEVER create more than 1 animation for 1 sentence

1. Identify the idea that the sentence is trying to convey
2. Show that idea in the simplest way possible

Abody's the goat

One thing I want you to walk away with...

Harder to create does NOT mean better result.
